

BST Global's BST10

Our comprehensive ERP solution is built specifically to help architects, engineers and consultancies around the globe manage their projects more efficiently and effectively.

BST10 empowers project managers, operations managers and finance professionals with everything you expect from an ERP solution, plus so much more. Project-driven, smart and collaborative, BST10 helps firms boost project profitability, positively impact cash flow, optimize utilization, apply meaningful data insights and seamlessly integrate with leading productivity tools and third-party investments, all within a consumer-grade user experience.

Key BST10 Features:

Project-Driven

We've put the project at the center of everything to make project creation easy and our flexible work-breakdown structure gives PMs the power to set projects up how they want.

Smart

BST10's predictive project management approach offers impact zone analysis, anomaly detection alerts, advanced business intelligence tools, and simple, beautiful data visualization on any device.

Collaborative

BST10 integrates with productivity tools, like Microsoft Teams and Power BI, to foster team collaboration and project information sharing. Plus, our expansive API keeps you seamlessly connected to all of your technology investments.

Configurable

BST10 Design Studio allows for screen modification, custom data fields, terminology adjustments, tailored workflows and more.

Multilingual

BST10 supports multiple languages in a single, integrated database, and enables you to create and deploy your own tailored language packs.

Mobile Timesheets

The native mobile app for timesheet entry and approval is accessible through Apple's App Store and Google Play.

Liberated Work-Breakdown Structure

Manage the simplest to the most complex project structures using native Gantt charts with features such as milestones and dependencies.

Deployment Flexibility

You can choose to host the application yourself or have BST Global host and manage it all for you in your own Virtual Private Cloud.

Visual Billing

Project managers can review and adjust prebills in a visual context and digitally send/receive payments.

"BST Global understands that a project-centric user experience is paramount to our customers, and therefore, it is a core tenet of BST10's design. Our solution was designed from the ground up for the demanding needs of project and operations managers, and we continue to evolve our solutions with them as the focus."

– Debbie Preacher, Chief Product Officer

+120K

More than 120,000 architects, engineers and consultants use our ERP and Work Management solutions each day to streamline their business processes and improve their bottom line.

Empower Every Team:

-  **Project Managers**
BST10 works the way PMs think, putting the project at the center and all the tools and information they need right at their fingertips.
-  **Operations Managers**
Our powerful, cohesive and intuitive ERP solution gives operations managers comprehensive visibility and data-driven insights to help achieve operational excellence.
-  **Finance Professionals**
Our suite of solutions equips finance and accounting managers with cutting-edge, innovative solutions for next-level flexibility, visibility and continuity at every turn.

"Our #1 objective was focused on project management – saving project managers' time and increasing their level of engagement within the software. Before, we had PMs that would absolutely refuse to even access their system because it wasn't intuitive. But with BST10, the overwhelming response, not just from the PMs but from every single employee of the company, has been about how intuitive and easy it is."

– Olie Abbamonto, Chief Financial Officer, Moffatt & Nichol

About BST Global
