

BST Global's

# BST10 Work Management

Complement your firm's current financial ERP investment with the power of BST Global's Work Management solution for better project and operational performance.

Our comprehensive work management solution is built specifically to help architects, engineers and consultancies around the globe manage their projects more efficiently and effectively. Providing the ability to seamlessly connect to your current ERP financial solution, BST10 helps firms deliver more profitable project results, increase utilization and team efficiencies, and empower team members, all within a consumer-grade user experience.

## Key BST10 Work Management Features:

### Project-Driven

Built by project managers for project managers, the BST10 Work Management solution increases team efficiencies by working the way your project teams need and expect it to.

### Smart

BST10's project intelligence™ leverages artificial intelligence to accurately predict project outcomes. Now, your project managers can proactively course-correct, changing project trajectories to deliver more profitable results.

### Collaborative & Connected

Our API seamlessly connects to your current ERP financial solution, Microsoft Teams and other third-party investments. This helps you save money, increase efficiency, empower your teams and boost morale.

### Liberated Work-Breakdown Structure

Manage the simplest to the most complex project structures using native Gantt charts with features such as milestones and dependencies.

### Resourcing

Optimize scheduling for your people, and manage workloads in real-time using data-driven decision-making.

### Mobile Timesheets

The native mobile app for timesheet entry and approval is accessible through Apple's App Store and Google Play.

### Configurable

BST10 Design Studio allows for screen modification, custom data fields, terminology adjustments, tailored workflows and more.

### Multilingual

BST10 supports multiple languages in a single, integrated database, and enables you to create and deploy your own tailored language packs.

### Deployment Flexibility

You can choose to host the application yourself or have BST Global host and manage it all for you in your own Virtual Private Cloud.

“

**“BST Global understands that a project-centric user experience is paramount to our customers, and therefore, it is a core tenet of BST10’s design. Our solution was designed from the ground up for the demanding needs of project and operations managers, and we continue to evolve our solutions with them as the focus.”**

– Debbie Preacher, Chief Product Officer

# +120K

More than 120,000 architects, engineers and consultants use our Work Management solutions each day to streamline their business processes and improve their bottom line.

## Empower Your Teams:

### Project Managers

BST10 works the way PMs think, putting the project at the center and all the tools and information they need right at their fingertips.

### Operations Managers

Our powerful, cohesive and intuitive solution gives operations managers comprehensive visibility and data-driven insights to help achieve operational excellence.

“

**“We wanted to find a solution that would empower our project, finance and leadership teams, providing visibility to real-time data to gain efficiencies across our entire organization of more than 5,000 employees while complementing our current ERP platforms.”**

– Mary Conway, SVP, PE, Business Process Officer, HNTB

## About BST Global
